SUMMARY

Full Stack Developer with 3+ years of experience building scalable web applications using Angular, React.js, Node.js, Express.js, and MongoDB. Skilled in REST APIs, microservices, WebSockets, and frontend/backend performance optimization. Experienced with CI/CD pipelines, Agile/Scrum, and SDLC, with a proven track record of delivering production-ready, high-availability systems with scalable architecture.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript

Frontend Technologies: Angular, React.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, Single Page Application (SPA)

Backend Technologies: Node.js, Express.js, REST API, RESTful Web Services, Microservices Architecture, Real-Time Applications, Event-Driven Architecture, API Development, Server-Side Development

Database: MongoDB

Testing: Jest, Unit Testing

DevOps & Tools: Git, GitHub, GitLab, CI/CD, Postman, VS Code

Methodologies: Agile, Scrum, SDLC, Component Architecture, Code Review, Debugging, Performance Optimization

WORK EXPERIENCE

Full Stack Developer

March 2023 – March 2026

Biocipher Technologies Pvt. Ltd., Gurugram, India

- Engineered core modules for CRM and real-time communication platforms, supporting lead management, agent tracking, live calling, and operational monitoring workflows.
- Implemented Web Real-Time Communication based live calling capabilities within microservices architecture to enable low-latency communication across CRM workflows.
- Architected scalable frontend and backend components using React.js, Angular, Node.js, and Express.js, improving UI performance by 25%.
- Designed and optimized RESTful APIs and backend services, reducing response time by 30% while improving throughput and system scalability.
- Built CPaaS campaign management modules supporting SMS, Email, WhatsApp, Voice, and RCS workflows with scheduling, automation, and execution capabilities.
- Developed real-time analytics dashboards, live tracking visualizations, and calendar-driven reporting interfaces for campaign performance monitoring.
- Automated CI/CD pipelines and deployment processes, improving release efficiency by 40% and reducing operational overhead.

- Ensured production stability and code quality through unit testing, debugging, performance tuning, peer code reviews, and Agile/Scrum collaboration.

Associate Software Engineer I

January 2022 – August 2022

Synoriq, Jaipur, India

- Contributed to the development of a Conveyance Management System by implementing frontend and backend modules supporting enterprise transportation workflows.
 - Crafted reusable and responsive UI components using Angular, React.js, HTML5, CSS, and Bootstrap to enhance user experience.
 - Implemented backend APIs and business logic using Node.js and Express.js to support workflow automation and module integrations.
 - Assisted with MongoDB data modeling and database integration for efficient data storage and retrieval.
 - Improved platform stability and maintainability through debugging, performance enhancements, and collaborative code reviews.
-

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

JC Bose University of Science & Technology, YMCA – Faridabad, India

Graduated: 2022
